LAB BAGGY

Code	MODA
Size	XS, S, M, L ,XL, XXL, XXXL
Color	● 9C BLACK
Weight	160 g
Recommended temperature range (Celsius)	18°/35°
Fitting	Standard fitting
Details	<ul style="list-style-type: none"> · Adjustable strap closure · Front zip pockets
Fabrics	PAPILLON FABRIC, 150 g/m2, UPF 50+
Composition	70% poliamid 30% elasthan

The LAB shorts are incredibly light and comfortable. Thanks to its four-way stretch and highly resistant Papillon fabric, it accompanies your movements for unrestricted pedaling while also wicking sweat quickly. It incorporates a buckle closure system for quick and easy adjustments, and zippered pockets allow you to secure your valuables. The Papillon fabric with 13% elastane is composed of a resistant and highly breathable microfiber. Thanks to its wave structure, it also provides windproofing qualities.

LAB LS TSHIRT

Code	MOD9
Size	XS, S, M, L ,XL, XXL, XXXL
Color	● 3A OLIVIVE ● 3B TURMALINA
Weight	149 g
Recommended temperature range (Celsius)	15°/25°
Fitting	Standard fitting
Details	<ul style="list-style-type: none"> · Reflective HIRU logo · Laser perforations on the sleeves for better breathability · Specific cut for MTB · Abrasion-resistant sleeves
Fabrics	AIR DOTS 110 g/m ² , UPF 30+ SPEEDY 160 g/m ² , UPF 50+
Composition	60% polyester 30% polyamid 10% elasthan

A t-shirt for as many fun rides as you can handle. Hot days are no problem with AIR DOTS fabric, composed of a thin, elastic microfiber and a micro-perforated outer structure that ensures ultra-fast drying and simultaneously increases ventilation. It also offers sun protection with a UPF rating of 30+. Sleeves are constructed with lightweight Speedy fabric, designed to offer the best qualities of elasticity and protection while maintaining excellent anti-abrasion properties. We added laser perforations to increase ventilation, and the result is more comfortable, breathable sleeves. The woven structure of the Speedy fabric provides long durability thanks to the recovery traits of the fabric.

ADVANCED

ADVANCED BAGGY

Code	MODF
Size	XS, S, M, L ,XL, XXL, XXXL
Color	● 9C BLACK
Weight	158 g
Recommended temperature range (Celsius)	18°/35°
Fitting	Standard fitting
Details	<ul style="list-style-type: none"> · Snap button closure · Two zippered side pockets · Reflective HIRU logo
Fabrics	RACE. 100 G/M2 AIRLIGHT. 110 G/M2
Composition	75% poliamid 25% elasthan

The best ally for your mountain bike outings. The Advanced Baggy is designed for freedom of movement on the bike, no matter how rough the trail may be, and can be worn alone or combined with the chamois on longer rides. This high-stretch, comfortable baggy is trail-ready with secure and strategically placed zippered hip pockets for small essentials. The race-quality fabric is ultra light yet highly resistant and elastic. Its soft feel against the skin and resistance to abrasion and pilling makes it ideal for off-road activities, and it is breathable and quick drying, thanks to the absence of elastomer.

CORE

CORE BAGGY

Code	MOD6
Size	XS, S, M, L ,XL, XXL, XXXL
Color	● 9C BLACK
Weight	165 g
Recommended temperature range (Celsius)	18°/35°
Fitting	Standard fitting
Details	<ul style="list-style-type: none"> · Three pockets · Adjustable velcro · Clasp button closure
Fabrics	AENERGIA BLACK DEPORTIVO MITI
Composition	100% polyester

The Core Baggy wicks sweat quickly and moves at your own pace, giving you freedom like no other mountain bike shorts. Comfortable and designed for optimal movement, this essential item features two traditional pockets and an extra zippered pocket on the right leg.

CORE LS TSHIRT

Code	MOD7
Size	XS, S, M, L ,XL, XXL, XXXL
Color	● 3D ORPIMENT ● 3E HELIOTROPE

ACCESORIOS

LINER BOXER

Code	MODE
Size	XS, S, M, L ,XL, XXL, XXXL
Color	● 9C BLACK
Weight	137 g
Recommended temperature range (Celsius)	18°/35°
Fitting	Tight Fitting
Details	<ul style="list-style-type: none"> · Silicone elastic on the thigh to ensure support · Elastic waistband with embossed HIRU logo
Fabrics	MESH LIGHT SERIE S 41
Composition	75% polyamid 25% elastan
Pad	ALL MOUNTAIN GEL PAD

A liner with a light and thin chamois provides unparalleled comfort for trail, enduro and off-road riding. It's the ideal complement for any of the 3 baggies in the Orbea x HIRU collection. It features two main fabrics: Super opaque mesh-light that manages moisture by keeping the skin and the chamois itself dry. And the crotch uses Serie S 41 fabric with a UPF 50+ rating, a high compression of 41% elastomer and a patented construction of minimal thickness that resists pilling. It's quick to dry and offers a compression effect that helps keep blood flowing.

GUIDELINES FOR PURCHASING THE RIGHT SHORTS.

These easy steps will help you to find the right shorts, which will become your faithful training and racing companion:

"Wear the shorts and adjust the bibs and leg bottom so as to eliminate any folds; the shorts must feel tight once on.

Leave on the shorts for a few minutes, bending your legs and assuming the bike position, then pinch the fabric in the thigh area and make sure that once you release the fabric, the Lycra returns to its

original position: this means that you are wearing the right size. If you experience an unpleasant sensation of friction or restriction, or if the stitches and bibs are pulling, try a bigger size.

Hiru shammies do not foresee the use of creams because they are soft and comfortable and studied to be worn."

Many issues that arise when using the shorts are not due to the shorts themselves, but to the wrong choice of the size or model, or improper washing of the articles (see above), indeed:

The bibs, the elastics, the leg bottom tend to curl up when wearing the article, but they can easily return to their original position with a few simple gestures.

The Lycra must confer a massage-effect to the muscles and a light compression, and it can only perform this function if it is fitted to the body.
